# SterilEnz™

## SterilEnz BioProcess Connectors Designed for Bag Systems & Tubing Sets

Dear Customer:

It is our pleasure to enclose some information about our new sanitary connectors, SterilEnz™.

SterilEnz connectors are being specified on bag systems manufactured by the leading bag companies. Some of the benefits are:

- **Sterility Assurance:** The SterilEnz true aseptic covering protects the TC end-fitting and the valuable solution inside your bag.
- **Extractables:** We mold the parts from the same plastic resins used by the major bag suppliers. This minimizes leachables and eases validation.
- **Security:** The over-wrap pouch provides a "tamper-evident" means to protect the solution inside your bag.
- **Economy:** SterilEnz connectors are less costly and easier to assemble than commodity end fittings.
- **Common Applications:**
  - For use as a connector on *Purification Buffer & Media Bags*.
  - Assembled and delivered with tubing as a *Presterilized Transfer Set*.

SterilEnz connectors are improving the world of disposable manufacturing products everywhere. We hope that you'll find the enclosed material informative.

Best Regards,

**PAW BioScience Products, Inc.**
